

## Directions for generating a **Threshold Analysis Report** in Aware (overall student performance)

<ol style="list-style-type: none"> <li>login to <b>Aware</b></li> <li>click <b>Analyze</b> tab</li> <li>select <b>Quick Views</b></li> <li>select any test:  <b>STAAR ...</b> or  <b>Local</b> </li> </ol> <p><i>The assessment selected will generate on the screen</i></p>	
<ol style="list-style-type: none"> <li>click the <b>Edit</b> button</li> <li>click the <b>Columns</b> tab</li> <li>Find and click the <b>Scores</b> folder. This folder contains the <b>lead4ward - Threshold Analysis</b> feature.</li> <li>Click and hold this field ... and drag it to the space on the right and release.</li> </ol>	
<ol style="list-style-type: none"> <li>The <b>Threshold Analysis</b> field can be used with any combination of other fields. Click and hold other fields on the <b>Columns</b> and/or <b>Summarize</b> tabs to either add or remove from the report ... based on district/campus preference.</li> <li>Click the <b>Update</b> button (bottom right corner)</li> </ol>	

11. The view provided to the right shows a Threshold Analysis Report with overall test performance.

lead4ward - Threshold Analysis							
Percent Score	≥35	≥45	≥55	≥65	≥75	≥85	≥95
67.36%	97.93%	92.98%	83.06%	57.85%	29.34%	10.74%	1.24%

Average % Score for all students on selected assessment

The percentages under each of the Threshold Analysis columns represent the proportion of students who scored at or above each threshold. In the example here, 83.06% of the students earned at least a 55 percent score; 57.85% earned at least a 65 percent score, and so on. These data are inclusive ... meaning that, in the example, the 10.74% who earned at least an 85 percent score are also included in each of the percentages for the lower thresholds.

### Directions for generating a student-level Threshold Analysis Report

12. A student-level Threshold Analysis view is also available by clicking the "Students" icon.

13. When the "Students" feature is selected, the lead4ward Threshold Analysis field transitions to a letter-code configuration.
